INDEPENDENT AUDITOR'S REPORT

The Board of Directors and Stockholders
Prudential Guarantee and Assurance, Inc.
Coyiuto House 119 C. Palanca Street,
Legaspi Village, Makati City

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Prudential Guarantee and Assurance, Inc. ("the Company"), which comprise the statements of financial position as of December 31, 2024 and 2023, and the statements of comprehensive income, statement of changes in equity and statements of cash flows for the years then ended, and notes to the financial statements, including material accounting policy information.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with Philippine Financial Reporting Standards (PFRS).

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to Note 29 to the financial statements which indicates that as of December 31, 2024, the Company has a net worth amounting to ₱992 million, based on the computation under Insurance Commission (IC) Circular Letter No. 02-2015. This translates to a net worth deficiency amounting to ₱308 million against the IC's minimum net worth requirement of ₱1.30 billion. Management has committed to take all necessary actions to ensure that the deficiency will be promptly and fully addressed to comply with the minimum statutory net worth requirement.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with PFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatements, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decision of users taken on the basis of these financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

Our audit was conducted for the purpose of forming an opinion on the basic financial statements of Prudential Guarantee and Assurance, Inc. taken as a whole. The supplementary information required by the Bureau of Internal Revenue as disclosed in Note 33 to the financial statements are presented for purposes of filing with the Bureau of Internal Revenue and are not required parts of the basic financial statements prepared in accordance with PFRS. Such supplementary information is the responsibility of management and has been subjected to the auditing procedures applied in our audit of the basic financial statements. In our opinion, the information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

PRUDENTIAL GUARANTEE AND ASSURANCE, INC.

NOTES TO FINANCIAL STATEMENTS

1. Corporate Information

Prudential Guarantee and Assurance, Inc. ("the Company") was incorporated in the Philippines to engage in the business and operation of all kinds of insurance on sea, land and air, of properties, goods and merchandise, transportation or conveyance, against fire, earthquake, marine perils, accidents and all other forms and lines of insurance authorized by law, except life insurance. It has a certificate of authority issued by the Insurance Commission (IC) to transact in non-life insurance business until December 31, 2024. The certificate of authority was subsequently renewed until December, 31, 2027.

The Company was registered with the Philippine Securities and Exchange Commission (SEC) on February 20, 1950. On March 8, 1999, it was approved by at least a majority of the Board of Directors (BOD) and the stockholders owning and representing at least two-thirds of the outstanding capital stock, that the Articles of Incorporation will be amended to extend the existence of the Company to another fifty years from its original expiry date. The SEC approved the Amended Articles of Incorporation on September 27, 1999.

The registered office address of the Company is Coyiuto House, 119 C. Palanca, Street, Legaspi Village, Makati City.

The accompanying financial statements were approved and authorized for issue by the BOD of the Company on April 29, 2025.

2. Material Accounting Policy Information

2.1 Statement of Compliance

The accompanying financial statements of the Company have been prepared in compliance with Philippine Financial Reporting Standards (PFRSs).

2.2 Basis of Measurement

The accompanying financial statements have been prepared on a historical cost basis, except for financial assets at fair value through profit or loss (FVPL), available-for-sale (AFS) financial assets, investment properties, certain property and equipment and the net pension asset/obligation which have been measured at present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any).

2.3 Functional and Presentation Currency

The financial statements are measured in Philippine Peso (₱), which is also Company's functional currency. All values are rounded off to the nearest peso values, unless otherwise indicated.

2.4 New Standards, Interpretations, and Amendments

2.4.1 New standards and amendments effective beginning on or after January 1, 2024

The following standards and amendments have become effective for the annual periods commencing on or after January 1, 2024.

Unless otherwise indicated, adoption of these new standards did not have an impact on the financial statements of the Company.

- Amendments to PAS 1, *Presentation of Financial Statements – Classification of Liabilities as Current or Non-current*

The amendments clarify:

- That only covenants with which an entity must comply on or before reporting date will affect a liability's classification as current or non-current;
- That classification is unaffected by the likelihood that an entity will exercise its deferral right; and,
- That only if an embedded derivative in a convertible liability is itself an equity instrument would the terms of a liability not impact its classification.

- Amendments to PFRS 16, *Lease Liability in a Sale and Leaseback*

The amendments specify how a seller-lessee measures the lease liability arising from a sale and leaseback transaction in a way that it does not recognize any amount of gain or loss that relates to the right of use retained.

- Amendments to PAS 7 and PFRS 7, *Statement of Cash Flows, and Financial Instruments: Disclosures – Supplier Finance Arrangements*

The amendments specify disclosure requirements to enhance the current requirements, which are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk.

2.5 Future Changes in Accounting Policies

The standards and interpretations that were issued, but not yet effective, up to the date of issuance of the Company's financial statements are listed below. The Company intends to adopt these standards when they become effective. Unless otherwise stated, adoption of these standards and interpretations are not expected to have any significant impact on the financial statements of the Company.

2.5.1 Effective on or after January 1, 2025

- Amendments to PAS 21, *Lack of Exchangeability*

2.5.2 Effective on or after January 1, 2026

- Amendments to PFRS 9 and PFRS 7, *Classification and Measurement of Financial Instruments*
- Amendments to PFRS 7, *Gain or Loss on Derecognition*
- Amendments to PFRS 9, *Lessee Derecognition of Lease Liabilities and Transaction Price*

2.5.3 Effective on or after January 1, 2027

- Amendments to PFRS 18, *Presentation and Disclosure in Financial Statements*
- PFRS 17, *Insurance Contracts*

2.5.4 Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

2.6 Product Classification

2.6.1 Insurance Contracts

Insurance contracts are those contracts where the Company (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Company determines whether it has significant insurance risk, by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

2.6.2 Investment Contracts

Investment Contracts mainly transfer financial risk but can also transfer insignificant risk. Once a contract has been classified as an insurance contract, it remains an insurance contract for the remainder of its lifetime, even if the insurance risk reduces significantly during this period, unless all rights and obligations are extinguished or has expired. Investment contracts can however be reclassified as insurance contracts after inception if the insurance risk becomes significant.

2.7 Foreign Currency Transactions and Translations

Transactions in foreign currencies are initially recorded at the functional currency rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency rate of exchange ruling at the end of the reporting period. Nonmonetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate as at the date of the initial transaction and are not subsequently restated. All foreign exchange differences are recognized in the statement of income, except where it relates to equity securities where gains or losses are recognized in other comprehensive income.

2.8 Fair Value Measurement

The Company measures financial instruments, such as financial assets at FVPL and AFS financial assets, at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level of input that is significant to the fair value measurement as a whole:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 – Valuation techniques for which the lowest level of input that is significant to the fair value measurement is directly or indirectly observable.

- Level 3 – Valuation techniques for which the lowest level of input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognized in the financial statement on a recurring basis, the Company determines whether transfers have occurred between Levels in the hierarchy by reassessing categorization (based on the lowest level of input that is significant to the fair value measurement as a whole) and at the end of each reporting date.

For fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

2.9 Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three (3) months or less from dates of placement and are subject to an insignificant risk of changes in value.

2.10 Short-term Investments

Short term investments are short-term placements with maturities of more than three (3) months but less than one (1) year from the date of acquisition. These earn interest at the respective short-term investment rates.

2.11 Insurance Receivables

Insurance receivables are recognized on policy inception dates and measured on initial recognition at the fair value of the consideration receivable for the period of coverage. Subsequent to initial recognition, insurance receivables are measured at amortized cost. The carrying value of insurance receivables is reviewed for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable, with the impairment loss recorded in the statement of income.

Insurance receivables are derecognized applying the derecognition criteria for financial assets.

2.12 Financial Instruments

2.12.1 Date of Recognition

Financial instruments are recognized in the statement of financial position when the Company becomes a party to the contractual provisions of the instrument. Purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace are recognized on the trade date.

2.12.2 Initial Recognition of Financial Instruments

Financial instruments are recognized initially at fair value of the consideration given (in case of an asset) or received (in the case of a liability). Except for financial instruments at FVPL, the initial measurement of financial assets includes transaction costs. The Company classifies its financial assets in the following categories: financial assets at FVPL, AFS financial assets, HTM financial assets, and loans and receivables. The Company classifies its financial liabilities into financial liabilities at FVPL and other liabilities. The classification depends on the purpose for which the investments were acquired and whether they are quoted in an active market.

Financial instruments are classified as liability or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

As of December 31, 2024 and 2023, the Company's financial instruments include financial assets at FVPL, AFS financial assets, HTM financial assets, loans and receivables and other financial liabilities.

2.12.3 "Day 1" Difference

Where the transaction price in a non-active market is different from the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, the Company recognizes the difference between the transaction price and fair value (a "Day 1" profit or loss) in the statement of income unless it qualifies for recognition as some other type of asset. In cases where an unobservable data is used, the difference between the transaction price and model value is only recognized in the statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, the Company determines the appropriate method of recognizing the "Day 1" difference amount.

2.12.4 "Financial Assets or Financial Liabilities at FVPL"

This category consists of financial assets or financial liabilities that are held for trading or those designated by management as at FVPL on initial recognition. Derivative instruments, except those covered by hedge accounting relationships, are also classified under this category.

Financial assets or financial liabilities may be designated at initial recognition as at FVPL if the following criteria are met: (a) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognizing gains or losses on them on a different basis; or (b) the assets or liabilities are part of a group of financial assets or liabilities which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management strategy; or (c) the financial asset or financial liabilities contains an embedded derivative that would need to be separately recorded.

Financial assets and financial liabilities at FVPL are recorded in the statement of financial position at fair value, with changes in the fair value recorded in the statement of income.

The Company's financial assets at FVPL as of December 31, 2024 and 2023 consist of Philippine Peso-denominated treasury bills and notes which are held for trading purposes. There are no financial liabilities at FVPL as of December 31, 2024 and 2023.

2.12.5 "AFS Financial Assets"

AFS financial assets are those which are designated as such or do not qualify to be classified as financial assets at FVPL, HTM financial assets or loans and receivables. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions.

After initial measurement, AFS financial assets are subsequently measured at fair value. For AFS debt securities, the effective yield component of it, as well as the impact of restatement on foreign currency-denominated debt securities, is reported in the statement of income. Interest earned on holding AFS financial assets are recorded as interest income in the statement of income using the effective interest rate. Dividends earned on holding AFS financial assets are recognized in the statement of income when the right to receive the payment has been established.

The unrealized gains and losses arising from the fair valuation of AFS financial assets are reported as "Revaluation reserve on available-for-sale financial assets" in the equity section of the statement of financial position. The losses arising from impairment of such investments are recognized as "Impairment losses on AFS financial assets" lodged under "Investment and other income – net". When the security is disposed of, the cumulative gain or loss previously recognized in equity– is recognized in the statement of income. Where the Company holds more than one investment in the same security, the cost used is determined using the weighted average method.

When the fair value of an unquoted AFS equity securities cannot be measured reliably because of lack of reliable estimates of future cash flows and discount rates necessary to calculate the fair value, these investments are carried at cost, less any allowance for impairment losses.

The Company's AFS financial assets as of December 31, 2024 and 2023 consist primarily of listed shares (common and preferred) in the Philippine Stock Exchange and country and club shares which were designated as AFS financial assets upon initial recognition.

As of December 31, 2024 and 2023, the Company has AFS financial assets amounting to ₱377.03 million and ₱364.84 million, respectively.

2.13 Loans and Receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments and fixed maturities that are not quoted in an active market. They are not entered into with the intention of immediate or short-term resale and are not classified as financial assets at FVPL or AFS financial assets.

After initial measurement, the loans and receivables are subsequently measured at amortized cost using the effective interest rate method, less any allowance for impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. The amortization is recorded as interest income in the statement of income. The loss arising from impairment of such loans and receivables are recognized in the statement of income. Any effects of restatement of foreign currency-denominated assets are recognized in the statement of income.

As of December 31, 2024 and 2023, the Company's loans and receivables consist of cash and cash equivalents, insurance receivables and employee receivables, interest receivables, mortgage loans receivable and other receivables.

2.14 HTM Financial Assets

HTM financial assets are quoted non-derivative financial assets with fixed or determinable payments and fixed maturities for which management has the positive intention and ability to hold to maturity.

Where the company sells other than an insignificant amount of HTM financial assets, the entire category would be tainted and reclassified as AFS financial assets. After initial measurement these investments are subsequently measured at amortized cost using the effective interest method, less any impairment in value. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees that are an integral part of the effective interest rate. Gains and losses are recognized in income when the HTM financial assets are derecognized and impaired, as well as through the amortization process. The losses arising from impairment of such investments are recognized in the statement of income. The effects of restatement on foreign currency-denominated HTM financial assets are recognized in the statement of income.

As of December 31, 2024 and 2023, the Company has HTM financial assets amounting to ₱518.37 million and ₱446.17 million, respectively.

2.15 Other Financial Liabilities

Issued financial instruments or their components, which are not designated at FVPL are classified as other financial liabilities, where the substance of the contractual arrangement results in the Company having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

After initial measurement, other financial liabilities are subsequently measured at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any discount or premium on the issue and fees that are an integral part of the effective interest rate. Any effects of restatement of foreign currency-denominated liabilities are recognized in the statement of income.

As of December 31, 2024 and 2023, the Company's other financial liabilities consists of insurance payables, accounts payable and accrued expenses excluding statutory liabilities and other liabilities that meet the above definition.

2.16 Impairment of Financial Assets

The Company assesses at each end of the reporting period whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred loss event) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

2.17 Loans and Receivables

For loans and receivables carried at amortized cost, the Company first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If the Company determines that no objective evidence of impairment exists for individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses for impairment. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be, recognized are not included in a collective assessment for impairment. For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of credit risk characteristics such as past-due

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows. The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. Time value is generally not considered when the effect of discounting is not material. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate, adjusted for the original credit risk premium.

The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of loss is charged against the statement of income. If, in a subsequent period, the amount of the estimated impairment loss decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed. Any subsequent reversal of an impairment loss is recognized in the statement of income, to the extent that the carrying value of the asset does not exceed its amortized cost at the reversal date.

2.18 Write-off

The Company writes-off its financial assets (except AFS securities) when it has been established that all efforts to collect and/or recover the loss has been exhausted. This may include the other party being insolvent, deceased or the obligation being unenforceable.

2.19 AFS Financial Assets

In case of equity investments classified as AFS, impairment indicators would include a significant or prolonged decline in the fair value of the investments below its cost. Where there is evidence of impairment, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the statement of income – is removed from other comprehensive income and recognized in the statement of income. Impairment losses on equity investments are not reversed through the statement of income. Increases in fair value after impairment are recognized directly in other comprehensive income.

In case of debt instruments, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Future interest income is based on the reduced carrying amount and is accrued using the rate of interest used to discount future cash flows for the purpose of measuring impairment loss and is recognized in profit or loss. If subsequently, the fair value of a debt instrument increased and the increase can be objectively related to an event occurring after the impairment loss was recognized in profit or loss, the impairment loss is reversed through profit or loss.

2.20 AFS Financial Assets Carried at Cost

If there is an objective evidence that an impairment loss on an unquoted equity instrument that is not carried at fair value because its fair value cannot be reliably measured, or on a derivative asset that is linked to and must be settled by delivery of such unquoted equity instrument has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset.

2.21 HTM Financial Assets

The Company assesses at each statement of financial position date whether objective evidence of impairment exists individually for financial assets that are individually significant. If there is objective evidence that an impairment loss has been incurred, the amount of loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted using the financial asset's original EIR.

If a financial asset carried at amortized cost has a variable interest rate, the discount rate for measuring any impairment loss is the current EIR, adjusted for the original credit risk premium. The losses arising from impairment of such investments are recognized as "Provision for credit and impairment losses" in profit or loss in the statement of income under "General expenses".

2.22 Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liability simultaneously. The Company assesses that it has a currently enforceable right to offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of insolvency or bankruptcy of the Company and all of the counterparties.

2.23 Derecognition of Financial Assets and Liabilities

2.23.1 Financial Assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognized where:

- the right to receive cash flows from the asset have expired;
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement; or
- the Company has transferred its right to receive cash flows from the asset and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Company has transferred its right to receive cash flows from an asset or has entered into a pass-through arrangement, and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of the Company's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

2.23.2 Financial Liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the statement of income.

2.24 Reinsurance

The Company cedes insurance risk in the normal course of business for all of its businesses. Reinsurance assets represent balances recoverable from unpaid losses incurred by the Company with coverage from reinsurance companies. Recoverable amounts are estimated in a manner consistent with the outstanding claims provision and are in accordance with the reinsurance contract. Reinsurance recoverable on paid losses are included as part of 'Insurance receivables – net'.

An impairment review is performed at each end of the reporting period or more frequently when an indication of impairment arises during the reporting year. Impairment occurs when objective evidence exists that the Company may not recover outstanding amounts under the terms of the contract, and when the impact on the amounts that the Company will receive from the reinsurer can be measured reliably. The impairment loss is recorded in the statement of income under 'General expenses'.

Ceded reinsurance arrangements do not relieve the Company from its obligations to policyholders.

The Company also assumes reinsurance risk in the normal course of business. Premiums and claims on assumed reinsurance are recognized as income and expenses in the same manner as they would be if the reinsurance were considered direct business, taking into account the product classification of the reinsured business. Reinsurance liabilities represent balances due to reinsurance companies. Amounts payable are estimated in a manner consistent with the associated reinsurance contract.

Premiums and claims are presented on a gross basis for both ceded and assumed reinsurance.

Reinsurance assets or liabilities are derecognized when the contractual rights expire, are extinguished or when the contract is transferred to another party.

2.25 Deferred Acquisition Costs (DAC)

Commission and other acquisition costs that vary with and are primarily related to the acquisition of new and renewal insurance contracts are deferred and charged to expense in proportion to the premium revenue recognized. Subsequent to initial recognition, these costs are amortized using 365th method.

Amortization is charged against the statement of income. The unamortized acquisition costs are shown in the assets section of the statement of financial position as "Deferred acquisition costs". All other acquisition costs are recognized as incurred.

An impairment review is performed at each end of the reporting period or more frequently when an indication of impairment arises. The carrying value is written down to the recoverable amount and the impairment loss is charged to the statement of income. The DAC is also considered in the liability adequacy test for each end of the reporting date.

2.26 Investment Property

Investment property is measured initially at cost, including transaction costs. Investment property pertains to property that is held to earn rent income or for capital appreciation or both, rather than for use in the production or supply of goods or services or for administrative purposes or sale in the ordinary course of business. Subsequent to initial recognition, investment properties are stated at fair values determined by an independent firm of appraisers. Gains or losses arising from changes in the fair values of investment properties are included in the Company statement of income and other comprehensive income for the period in which they arise, including the corresponding tax effect.

Investment property being constructed is included under the investment property account until the time when the construction related activities necessary to prepare the investment property for the intended use are complete. Investment property being constructed is carried at cost when the fair value cannot be reliably determined.

Transfers are made to investment property when there is a change in use, evidenced by ending of owner-occupation or commencement of an operating lease to another party. Transfers are made from investment property when, and only when, there is a change in use, evidenced by commencement of owner-occupation. Transfers between investment property and owner-occupied property do not change the carrying amount of the property transferred and they do not change the cost of that property for measurement or disclosure purposes.

Investment properties are derecognized either when they have been disposed or when the asset is permanently withdrawn from use and no future economic benefits are expected from its disposal. Any gain or loss arising from derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the Company statement of income.

2.27 Property and Equipment

Property and equipment, except for land and buildings, are stated at cost, net of accumulated depreciation and any impairment in value.

The initial cost of property and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property and equipment have been put into operations, such as repairs and maintenance, are charged to income in the period in which the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of property and equipment.

Land and buildings are measured at fair value less accumulated depreciation and impairment losses recognized after the date of the revaluation. Valuations are performed frequently enough to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Any revaluation surplus is credited to the revaluation surplus included in the statement of financial position, except to the extent that it reverses a revaluation decrease of the same asset previously recognized in profit or loss, in which case the increase is recognized in profit or loss. A revaluation deficit is recognized in the statement of income, except to the extent that it offsets an existing surplus on the same asset recognized in the revaluation surplus.

Accumulated depreciation as of the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred to retained earnings.

Depreciation of an item of property and equipment begins when it becomes available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by the management. Depreciation is calculated using the straight-line method over the estimated useful life of the corresponding asset. Leasehold improvements are amortized over the shorter of the related lease term or the estimated useful life. The estimated useful lives of items of property and equipment are as follows:

Property and Equipment	Years
Office furniture, fixtures and equipment	5–10
Transportation equipment	5–10
Leasehold improvements	10*
Building and building improvements	20

**or term of the lease contract, whichever is shorter*

Each part of an item of property and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The assets' estimated useful lives and depreciation method are reviewed periodically to ensure that the periods and method of depreciation are consistent with the expected pattern of economic benefits from the items of property and equipment.

Fully depreciated assets are retained in the accounts until they are no longer in use and no further depreciation are credited to or charged against the current operations.

When assets are retired or otherwise disposed of, the cost and the related accumulated depreciation and impairment in value are removed from the accounts and any gain or loss resulting from their disposals is credited to or charged against the current operations.

2.28 Intangible Assets

The Company's intangible assets pertain to its computer software. Cost associated with the acquisition or maintaining computer software programs are recognized as expense when incurred. Costs that are directly associated with identifiable and unique software controlled by the Company, which will generate economic benefits beyond one (1) year, are recognized as intangible assets.

Expenditures which enhance or extend the performance of computer software programs beyond their original specifications are capitalized and added to the original cost of the software. Computer software development costs are recognized as assets are carried at cost less accumulated amortization. The costs are amortized using the straight-line method over their estimated useful lives of five (5) years.

2.29 Impairment of Nonfinancial Assets

The Company assesses at each reporting date whether there is an indication that property and equipment, investment property (except those measured at fair value), computer software, and right-of-use asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized.

If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the statement of income unless the asset is carried at revalued amount, in which case, the reversal is treated as a revaluation increase. After such reversal the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining estimated useful life.

2.30 Creditable Withholding Taxes (CWTs)

Creditable withholding taxes pertain to the taxes paid by the Company withheld by its counterparty for the payment of its expenses and other purchases. These CWTs are initially recorded at cost and included as part of "Other assets" in the statement of financial position.

CWTs may either be offset against income tax payable or be claimed as a refund from the taxation authorities at the option of the Company. If these CWTs are claimed as a refund, these will be recorded as a receivable under "Loans and receivables" in the statement of financial position.

At each end of the reporting period, an assessment for impairment is performed to assess the recoverability of the Company's CWTs.

2.31 Value-Added Tax (VAT)

Revenues, expenses, assets and liabilities are recognized net of the amount of VAT, except where the VAT incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case the VAT is recognized as part of the cost of acquisition of the asset or as part of the expense item as applicable.

The net amount of VAT recoverable from, or payable to, the taxation authority is included as part of "Other assets" or "Accounts payable and accrued expenses" in the statement of financial position.

2.32 Insurance Contract Liabilities

2.32.1 Provision for Unearned Premiums

The proportion of written premiums, gross of commissions payable to intermediaries, attributable to subsequent periods or to risks that have not yet expired is deferred as provision for unearned premiums. Premiums from short-duration insurance contracts are recognized as revenue over the period of the contracts using the 365th method. The change in the provision for unearned premiums is taken to the statement of income in the order that revenue is recognized over the period of risk. Further provisions are made to cover claims under unexpired insurance contracts which may exceed the unearned premiums and the premiums due in respect of these contracts.

2.32.2 Provision for Claims Reported and Incurred But Not Reported (IBNR) Losses

Provision for claims reported and IBNR losses are based on the estimated ultimate cost of all claims incurred but not settled at the end of the reporting period, whether reported or not, together with related claims handling costs and reduction for the expected value of salvage and other recoveries. Delays can be experienced in the notification and settlement of certain types of claims, therefore the ultimate cost of which cannot be known with certainty at the reporting date.

The IBNR losses are calculated based on standard actuarial projection techniques or combination of such techniques, such as but not limited to the chain ladder method, the expected loss ratio approach, the Bornhuetter–Ferguson method. At each reporting date, prior year claims estimates are reassessed for adequacy and changes made are charged to provision.

2.32.3 Liability Adequacy Test

At each reporting date, liability adequacy tests are performed, to ensure the adequacy of insurance contract liabilities, net of related DAC assets. In performing the test, current best estimates of future cash flows, claims handling and policy administration expenses are used. Changes in expected claims that have occurred, but which have not been settled, are reflected by adjusting the liability for claims and future benefits. Any inadequacy is immediately charged to profit or loss by establishing an unexpired risk provision for losses arising from the liability adequacy tests. The provision for unearned premiums is increased to the extent that the future claims and expenses in respect of current insurance contracts exceed future premiums plus the current provision for unearned premiums.

2.33 Net Pension Asset/Obligation

The net defined benefit obligation or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefit costs comprise the following:

- Service cost
- Net interest on the net defined benefit liability or asset
- Remeasurements of the net defined benefit liability or asset

Service cost includes current service cost, past service cost and gains or losses on non-routine settlements are recognized as expense in the statement of income. Past service cost is recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit obligation or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit obligation or asset is recognized as expense or income in the statement of income.

Remeasurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit obligation) are recognized immediately in other comprehensive income in the period in which they arise. Remeasurements are not reclassified to the statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Plan assets are not available to the creditors of the Company, nor can they be paid directly to the Company. Fair value of plan assets is based on market price information.

When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The Company's right to be reimbursed of some or all of the expenditure required to settle a defined benefit obligation is recognized as a separate asset at fair value when and only when reimbursement is virtually certain.

2.34 Equity

Capital stock represents the value of shares that have been issued at par. Proceeds and or fair value of considerations received in excess of par value, if any, are recognized as part of "Contributed surplus". The transaction costs incurred as a necessary part of completing an equity transaction are accounted for as part of the transaction and are deducted from "Contributed surplus".

Contingency surplus pertains to capital infusions of shareholders to cover any deficiency in the solvency requirements by the Philippine IC and can be withdrawn only upon approval of the same.

Retained earnings include all the accumulated earnings of the Company less any dividends declared.

2.35 Revenue Recognition

Revenue is recognized to the extent that it is probable that economic benefits associated with the transaction will flow to the Company and the revenue can be reliably measured.

The Company follows a five-step model to account for revenue arising from contracts with customers. The five-step model is as follows:

- a. Identify the contract(s) with a customer
- b. Identify the performance obligations in the contract
- c. Determine the transaction price
- d. Allocate the transaction price to the performance obligation in the contract
- e. Recognize revenue when (or as) the entity satisfies a performance obligation

Revenue is recognized at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The Company exercises its judgement, taking into consideration all of the relevant facts and circumstances when applying each step of the model to contracts with their customers. The Company has concluded that it is acting as a principal in all of its revenue arrangements.

2.35.1 Revenues Outside the Scope of PFRS 15

The following specific recognition criteria must also be met before revenue is recognized within the scope of PFRS 15:

Other income

Other income is recognized in the profit or loss as it accrues when there is reasonable degree of certainty as to its collectability. This includes income charged to related parties for administrative services.

2.35.2 Revenues Outside the Scope of PFRS

2.35.2.1 Premium revenue

Gross insurance written premiums comprise the total premiums receivable for the whole period of cover provided by contracts entered into during the accounting period and are recognized on the inception date of the policy. Premiums include any adjustments arising in the accounting period for premiums receivable in respect of business written in prior periods.

Premiums are recognized as revenue over the period of the contracts using the 365th method. The portion of the premiums written and assumed that relate to the unexpired periods of the policies as of reporting date are accounted for as provision for unearned premiums and presented as part of "Insurance contract liabilities" in the statement of financial position. The related reinsurance premiums that pertain to the unexpired periods at reporting date are accounted for as deferred reinsurance premiums and presented as part of "Reinsurance assets" in the statement of financial position. The net changes in these accounts between reporting dates are charged against or credited to income or loss for the year.

2.35.2.2 Commission income

Commissions earned from short-duration insurance contracts are recognized as revenue over the period of contracts using the 365th method. The portion of the commissions that relates to the unexpired periods of the policies at the reporting date are accounted for as part of "Deferred reinsurance commissions" and presented in the statement of financial position.

2.35.2.3 Interest income

Interest income is recognized in the statement of income as it accrues, taking into account the effective yield of the asset. Interest income includes the amortization of any discount or premium using the effective interest method. Interest income is recognized in the statement of income as it accrues, taking into account the effective yield of the asset. Interest income includes the amortization of any discount or premium using the effective interest method.

2.35.2.4 Dividend income

Dividend income is recognized when the Company's right to receive the payment is established.

2.35.2.5 Rental income

Rental income is recognized on a straight-line basis over the term of the lease agreement.

2.36 Expense Recognition

Expenses are decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurrence of liabilities that result in decrease in equity, other than those relating to distribution to equity participants.

2.36.1 Benefits and Claims

Gross benefits and claims consist of benefits and claims paid to policyholders, which include changes in the gross valuation of insurance contract liabilities, except for gross changes in the provision for unearned premiums which are recorded in gross premiums earned. It further includes internal and external claims handling costs that are directly related to the processing and settlement of claims.

Amounts receivable in respect of salvage and subrogation are also considered and are offset against the related claims. Insurance claims are recorded on the basis of notification received.

2.36.2 Other Underwriting Expenses

Other underwriting expense pertains to the costs incurred by the Company prior to the issuance of policies to its policyholders. These costs include expenses for technical inspections, actuarial reviews and other work that is necessary to determine whether or not to accept the risks to be written. These costs are recognized as expense as they are incurred.

2.36.3 General Expenses

General expenses are recognized in the statement of income as they are incurred.

2.37 Company as a Lessee

Operating leases represent those leases under which substantially all risks and rewards of ownership of the leased assets remains with the lessor. Operating lease payments are recognized as an expense in the statement of income on a straight-line basis over the lease term.

2.38 Company as a Lessor

Leases where the Company retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income.

2.39 Leases

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognizes lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

2.39.1 Right-of-use Asset

The Company recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received and estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories. Unless the Company is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets are depreciated on a straight-line basis over the lease term.

Right-of-use assets are subject to impairment. Refer to the accounting policies in section impairment of non-financial assets.

2.39.2 Lease liabilities

At the commencement date of the lease, the Company recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Company and payments of penalties for terminating a lease, if the lease term reflects the Company exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognized as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Company uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

2.39.3 Short-term Leases and Leases of Low-Value Assets

The Company applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (i.e., those leases that have a lease term of twelve (12) months or less from the commencement date and do not contain a purchase option). It also applies the leases of low-value assets recognition exemption to leases that are considered of low value (i.e. ₱0.03 million or less).

Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

2.40 Income Tax

2.40.1 Current Tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that have been enacted or substantively enacted at the end of the reporting period.

Current income tax for current and prior periods, shall, to the extent unpaid, be recognized as a liability and is presented as "Income tax payable" in the statement of financial position. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess shall be recognized as prepaid income tax included as part of "Other assets" in the statement of financial position.

2.40.2 Deferred Income Tax

Deferred income tax is provided using, the liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized for all deductible temporary differences, carry forward benefit of the excess of minimum corporate income tax (MCIT) over regular corporate income tax (RCIT) and unused net operating loss carryover (NOLCO), to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and carry forward of MCIT and unused NOLCO can be utilized.

Deferred income tax that relates to items that are recognized (a) in other comprehensive income shall be recognized in other comprehensive income and (b) directly in equity shall be recognized directly in equity account.

The carrying amount of deferred income tax assets is reviewed at the end of each reporting date and reduced to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at the end of each reporting date and are recognized to the extent that it has become probable that future taxable income will allow all or part of deferred income tax assets to be recovered.

Deferred income tax assets and liabilities are measured at the tax rate that is expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date. Movements in the deferred income tax assets and liabilities arising from changes in tax rates are credited to or charged against income or loss for the period.

Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities, and the deferred taxes relate to the same taxable entity and the same taxation authority.

2.41 Provisions

Provisions are recognized only when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Where the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the statement of income, net of any reimbursement. If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as an interest expense.

2.42 Contingencies

Contingent liabilities are not recognized in the financial statements.

They are disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the financial statements but are disclosed when an inflow of economic benefits is probable. If it has become virtually certain that an inflow of economic benefits will arise, the asset and the related income are recognized in the statement of income.

2.43 Events After the End of the Reporting Date

Post year-end events that provide additional information about the Company's position at the end of the reporting date (adjusting events) are reflected in the Company's financial statements. Post year-end events that are not adjusting events are disclosed in the notes to the financial statements when material.

3. Significant Accounting Judgments and Estimates

The preparation of the financial statements in accordance with PFRS requires the Company to make judgments and estimates that affect the reported amounts of assets, liabilities, income and expenses and disclosure of contingent assets and liabilities. Future events may occur which will cause the judgments and assumptions used in arriving at the estimates to change. The effects of any change in judgments and estimates are reflected in the financial statements as they become reasonably determinable.

Judgments and estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be determinable under the circumstances.

3.1 Judgments

In the process of applying the Company's accounting policies, management has made the following judgments apart from those involving estimations and assumptions, which has the most significant effect on the amounts recognized in the financial statements.

3.1.1 Provisions

Provisions pertain to provision for legal cases and other estimated liabilities. The Company makes provisions management's and legal counsel's opinion and assessment of the potential outcome of the claims arising from interpretations and applications of statutes applicable to the Company. The determination of whether the provision should be recognized and the estimation of the potential liability from these assessments requires significant estimate and judgment by management.

Provisions for estimated liabilities amounted to ₱384.42 million and ₱381.74 million as of December 31, 2024 and 2023, respectively (see Note 16).

3.1.2 Classification of Financial Assets

The Company classifies a financial instrument depending on the purpose for which the financial instrument was acquired or originated. Management determines the classification of its financial instrument at initial recognition and, where allowed and appropriate, re-evaluates this classification at the end of each reporting date.

In addition, the Company classifies financial instruments by evaluating, among others, whether the asset is quoted or not in an active market. Included in the evaluation on whether a financial instrument is quoted in an active market is the determination on whether prices are readily and regularly available, and whether those prices represent actual and regularly occurring market transactions on an arm's length basis.

The classification of the Company's financial instruments by categories are presented under Notes 7 and 29.

3.1.3 Determination of Lease Term of Contracts with Renewal and Termination Options

Under PFRS 16–Company as a lessee

The Company has several lease contracts that include extension and termination options. Under PFRS 16, the Company applies judgment in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Company reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements or significant customization to the leased asset).

The Company did not consider the renewal options in determining the lease term of the contracts since it is subject to mutual agreement by the Company and the lessors.

3.1.4 Distinction between Property and Equipment and Investment Property

The Company determines whether a property qualifies as property and equipment or investment property. In making its judgment, the Company considers whether the property is held for use in the supply of services, or is held for capital appreciation, and to earn rentals, in which case the property shall be classified as property and equipment or investment property, respectively, as the case may be. The Company considers each property separately in making its judgment.

Where a single property is partly held for use in the supply of services and partly for capital appreciation or rentals and that the property cannot be separately sold or leased out under a finance lease, the property is considered by management as investment property only if an insignificant portion is held for use in the supply of services.

As of December 31, 2024 and 2023, the carrying value of property and equipment amounted to ₱1,251.85 million and ₱1,009.26 million, respectively (see Note 11), while the carrying value of investment properties amounted to ₱961.91 million and ₱906.23 million, respectively (see Note 10).

3.2 Estimates

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

3.2.1 Valuation of insurance Contract Liabilities

For nonlife insurance contracts, estimates have to be made both for the expected ultimate cost of claims reported at the end of the reporting period and for the expected ultimate cost of the IBNR claims at the reporting date. It can take a significant period of time before the ultimate claim costs can be established with certainty and for some type of policies, IBNR claims form the majority of the statement of financial position claims provision. The IBNR provision of the Company has been calculated using standard actuarial projection techniques using past development patterns to determine the expected future development and project the claim amounts for each accident year to its ultimate value. A number of different valuation methodologies have been adopted, each with their own strengths and blended them together which include: (a) paid chain ladder method (with and without Bornhuetter–Ferguson (BF) adjustments); (b) reported chain ladder method (with and without BF adjustments); and (c) expected loss ratio method. At each reporting date, prior year claims estimates are reassessed for adequacy and changes made are charged to provision.

The main assumption underlying the estimation of the claims provision is that a Company's past claims development experience can be used to project future claims development and hence ultimate claim costs. Historical claims development is mainly analyzed by accident years but can also be further analyzed by significant business lines and claim types. Large claims are usually separately addressed, either by being reserved at the face value of loss adjuster estimates or separately projected in order to reflect their future development. In most cases, no explicit assumptions are made regarding future rates of claims inflation or loss ratios. Instead, the assumptions used are those implicit in the historical claims development data on which the projections are based.

The carrying value of claims reported and IBNR amounted to ₱5,627.79 million and ₱5,448.39 million as of December 31, 2024 and 2023, respectively (see Note 14).

3.2.2 Impairment of AFS Equity Financial Assets

The Company determines that AFS equity financial assets are impaired when there has been a significant or prolonged decline in the fair value below its cost. This determination of what is 'significant' or 'prolonged' requires judgment. The Company treats 'significant' generally as 20% or more and 'prolonged' as greater than twelve months for equity securities. In addition, the Company evaluates among other factors, the normal volatility in share price for quoted securities, and the future cash flows and the discount factors for unquoted securities. Impairment may also be appropriate when there is evidence of deterioration in the financial health of the investee, industry and sector performance, changes in technology, and operating and financing cash flows.

As of December 31, 2024 and 2023, the carrying value of the Company's AFS equity financial assets amounted to ₱377.03 million and ₱364.84 million, respectively. Impairment losses recognized in 2024 and 2023 amounted to nil and ₱0.49 million, respectively (see Note 7).

3.2.3 Estimation of Allowance for Credit Losses on Receivables

The Company maintains an allowance for credit losses at a level considered adequate to provide for potential uncollectible receivables. The level of this allowance is evaluated by management on the basis of factors that affect the collectability of the accounts. These factors include, but are not limited to, the length of the Company's relationship with the debtor, the debtor's payment behavior and known market forces. The Company reviews the age and status of receivables, and identifies accounts that are to be provided with allowances on a continuous basis. The amount and timing of recorded expenses for any period would differ if the Company made different judgments or utilized different estimates.

The carrying values of insurance receivables amounted to ₱4,937.45 million and ₱4,671.34 million as of December 31, 2024 and 2023, respectively. As of December 31, 2024 and 2023, allowance for credit losses on insurance receivables amounted to ₱101.29 million (see Note 6).

3.2.4 Estimation of Useful Lives of Property and Equipment and Computer Software

The Company reviews annually the estimated useful lives of property and equipment and computer software based on expected asset utilization. It is possible that future results of operations could be materially affected by changes in these estimates. A reduction in the estimated useful lives of property and equipment would increase recorded depreciation and amortization expense and decrease the related asset accounts.

As of December 31, 2024 and 2023, the carrying value of property and equipment amounted to ₱1,251.85 million and ₱1,009.26 million, respectively (see Note 11), while the carrying value of intangible assets amounted to ₱119.55 million and ₱78.74 million, respectively (see Note 12).

3.2.5 Evaluation of Impairment of Property and Equipment, Computer Software, and Right-of-Use Asset

The Company assesses the impairment of its non-financial assets whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable.

The factors that the Company considers important which could trigger an impairment review include the following:

- significant underperformance relative to expected historical or projected future operating results;
- significant changes in the manner of use of the assets; and
- significant negative industry or economic trends.

As of December 31, 2024 and 2023, the Company did not recognize impairment losses on its building classified as property and equipment (see Note 11).

3.2.6 Fair Values of Land and Buildings Classified as Investment Property and Property and Equipment

The fair value of the land is derived from the current market prices of comparable properties while the fair value of building is derived from the current costs of the components of building and building improvements with adjustments on the depreciation and comparison with similar properties. The fair value of land and buildings is based on a valuation of an independent appraiser that has experience in valuing property in the same location as the Company's land and buildings. The Company's land and buildings were appraised by an independent firm of appraisers.

As of December 31, 2024 and 2023, the fair value of land and building classified as investment property amounted to ₱961.91 million and ₱906.23 million, respectively, and property and equipment amounted to ₱1,111.54 million and ₱861.78 million, respectively (see Notes 10 and 11).

3.2.7 Estimation of Pension Obligation

The determination of pension obligation and cost of pension is dependent on the selection of certain assumptions used in calculating such amounts. Those assumptions include, among others, discount rates and salary increase rates.

Due to the long-term nature of this plan, such estimates are subject to significant uncertainty.

The assumed discount rates were determined using the market yields on Philippine government bonds with terms consistent with the expected employee benefit payout as of the reporting date. In accordance with PAS 19, actual results that differ from the Company's assumptions are recognized immediately in other comprehensive income in the period in which they arise. While the Company believes that the assumptions are reasonable and appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the pension obligations. See Note 17 for the related balances.

The carrying value of net pension asset as of December 31, 2024 and 2023, amounted to ₱79.25 million and ₱94.30 million, respectively (see Note 17).

4. Cash and Cash Equivalents

This account consists of:

	2024	2023
Cash on hand	₱598,000	₱578,000
Cash in banks	1,398,414,483	1,099,306,527
Cash equivalents	3,471,056,283	3,295,562,721
	₱4,870,068,766	₱4,395,447,248

Cash in banks earn annual interest at the respective bank deposit rates. Cash equivalents are made for varying periods of up to three (3) months from the date of acquisition depending on the immediate cash requirements of the Company. The annual interest rates of cash equivalents range from 3.125% to 6.05% in 2024 and 3.10% to 6.38% in 2023. Interest income earned on cash and cash equivalents in 2024 and 2023 amounted to ₱181.90 million and ₱179.12 million, respectively (see Note 21). Interest accrued on cash and cash equivalents amounted to ₱12.58 million and ₱11.45 million as of December 31, 2024, and 2023, respectively (see Note 7).

5. Short-term Investments

The roll forward analysis of this account follows:

	2024	2023
On January 1	₱780,056,688	₱453,482,427
Acquisitions	17,640,569	777,103,708
Maturities	(780,056,688)	(453,482,427)
Foreign exchange gains	—	2,952,980
	₱17,640,569	₱780,056,688

Short-term investments consist of time deposits with maturities of more than three (3) months but less than one (1) year from dates of placement. The annual interest rates of short-term investments range from 3.15% to 3.50% in 2024 and 2.50% to 6.38% in 2023. Interest income earned in 2024 and 2023 amounted to ₱30.07 million and ₱19.19 million, respectively (see Note 21). Accrued interest income amounted to ₱0.15 million and ₱9.67 million as of December 31, 2024, and 2023, respectively (see Note 7).

6. Insurance Receivables – net

This account consists of:

	2024	2023
Due from agents and brokers	₱3,925,913,780	₱3,753,407,402
Reinsurance recoverable on paid losses	820,738,650	948,600,299

	₱1,533,499,143	₱1,350,669,769	₱775,404,683	₱268,673,730

	121 to 360 days	over 360 days	Allowance for Impairment Losses	Total
Due from agents and brokers	₱364,660,560	₱—	(₱44,170,424)	₱3,709,236,978
Reinsurance recoverable on paid losses	222,849,359	195,286,800	(55,647,640)	892,952,659
Due from ceding companies	39,983,591	21,598,055	(1,468,427)	69,149,562
	₱627,493,510	₱216,884,855	(₱101,286,491)	₱4,671,339,199

As of December 31, 2024 and 2023, the allowance for credit losses was determined by management based on specific identification of impaired accounts which were fully provided with allowances.

7. Financial Assets

The Company's financial assets are summarized by measurement categories as follows:

	2024	2023
Financial assets at FVPL	P2,150,834,125	P1,495,151,110
AFS financial assets	377,027,373	364,843,359
HTM financial assets	518,365,868	446,169,271
Loans and receivables – net	54,653,763	81,640,174
	P3,100,881,129	P2,387,803,914

a. Financial Assets at FVPL

Financial assets at FVPL consist of Philippine Peso-denominated treasury bills and notes which are held for trading purposes.

The movements in the carrying values of financial assets at FVPL as of December 31, 2024 and 2023 are as follows:

	Note	2024	2023
At January 1		P1,495,151,110	P1,842,317,722
Acquisitions		1,966,956,079	1,670,452,850
Disposals		(1,366,891,348)	(2,072,025,043)
Fair value gains	21	55,618,283	54,405,581
		P2,150,834,125	P1,495,151,110

Financial assets at FVPL earned annual interest ranging from nil to 6.25% in 2024 and nil to 6.13% in 2023. Interest income amounted to P18.57 million and P14.00 million in 2024 and 2023, respectively (see Note 21). Accrued interest receivables amounted to P2.10 million and P2.76 million (see loans and receivables – net section) in 2024 and 2023, respectively.

b. AFS Financial Assets

This account consists of quoted equity securities.

	2024		2023	
	Cost	Fair value	Cost	Fair value
Common shares	P190,143,899	P161,139,608	P190,143,899	P174,731,874
Preferred shares	44,800,000	43,787,765	58,000,000	55,061,485
Club shares	1,353,000	172,100,000	1,433,000	135,050,000
	P236,296,899	P377,027,373	P249,576,899	P364,843,359

Quoted equity securities include common and preferred shares listed in the Philippine Stock Exchange.

Dividend income earned amounted to P14.18 million and P15.24 million in 2024 and in 2023, respectively (see Note 21).

The movements in the carrying values of AFS financial assets as of December 31, 2024 and 2023 are as follows:

	2024	2023
On January 1	P364,843,359	P414,865,477
Acquisitions	–	1,864,138
Fair value gains recognized in other comprehensive income – net	25,384,013	(33,897,180)
Disposals	(13,200,000)	(17,501,076)
Impairment losses	–	(488,000)
	P377,027,372	P364,843,359

Impairment losses in 2024 amounted to nil and P0.49 million in 2023.

The movements in revaluation reserve on AFS financial assets as of December 31 are as follows:

	2024	2023
On January 1	P115,346,460	P149,243,640
Fair value gains recognized in other comprehensive income	25,384,013	(34,385,180)
Impairment losses	–	488,000
	25,384,013	(33,897,180)
On December 31	P140,730,473	P115,346,460

c. Held-to-maturity financial assets

HTM financial assets consist of Philippine Peso-denominated treasury bills, notes and time deposits with terms more than one year and which are held until maturity.

The movements in the carrying values of HTM financial assets as of December 31, 2024 and 2023 are as follows:

	2024	2023
At January 1	P446,169,271	P764,896,807
Acquisitions	302,461,819	49,531,089
Maturities	(242,000,000)	(367,331,574)
Amortization of interest	11,734,778	(3,487,987)
Foreign exchange gains	–	2,560,936
	P518,365,868	P446,169,271

d. Loans and receivables – net

This account consists of:

	Notes	2024	2023
Employee receivables		P12,383,420	P11,452,399
Interest receivables from:			
Cash equivalents	4	12,581,257	11,450,551
Short-term investments	5	149,818	9,671,351
Financial assets at FVPL		2,100,703	2,761,807
HTM financial assets		1,327,117	1,496,236
Dividend receivables		383,145	763,353
Mortgage loans receivable		–	39,308
Advances to a shareholder	20	26,181,845	41,904,615
Other receivables		1,539,062	4,093,158
		56,646,367	83,632,778
Less: Allowance for credit losses		(1,992,604)	(1,992,604)
		P54,653,763	P81,640,174

Employee receivables pertain to non-interest bearing loans extended by the Company to regular employees. These are collected through deduction from the employees' salaries for a period of not more than one (1) year.

Interest receivables consist of accrued interest income from bonds, special savings account and short-term investments.

Mortgage loans receivable pertain to car loans granted to regular employees of the Company.

Other receivables refer and recoverable medical expenses from health and accident insurance.

The allowance for impairment losses amounted to ₱1.99 million in 2024 and 2023.

8. Deferred Acquisition Costs and Deferred Reinsurance Commissions

- a. The movements in deferred acquisition costs as of December 31, 2024 and 2023 are as follows:

	2024	2023
At January 1	₱1,114,348,286	₱1,441,949,046
Cost deferred during the year	2,488,890,285	2,010,822,281
Amortization during the year	(2,392,410,559)	(2,338,423,041)
	₱1,210,828,012	₱1,114,348,286

- b. The movements in deferred reinsurance commissions as of December 31, 2024 and 2023 are as follows:

	2024	2023
At January 1	₱126,593,153	₱137,357,057
Income deferred during the year	189,760,683	297,003,362
Amortization during the year	(217,905,561)	(307,767,266)
	₱98,448,275	₱126,593,153

9. Reinsurance Assets

This account consists of:

	2024	2023
Deferred reinsurance premiums	₱2,752,064,820	₱3,705,333,810
Reinsurance recoverable on unpaid losses	2,623,387,465	1,946,884,978
Reinsurance recoverable on unpaid losses – claims IBNR	1,261,671,002	909,241,803
	₱6,637,123,287	₱6,561,460,591

10. Investment Properties

The roll forward analyses of this account follow:

	December 31, 2024		
	Land	Building	Total
At beginning of year	₱848,994,380	₱57,231,150	₱906,225,530
Fair value gain during the year (Note 21)	50,728,684	4,956,080	55,684,764
Net book value	₱899,723,064	₱62,187,230	₱961,910,294

December 31, 2023

	Land	Building	Total
At beginning of year	P808,037,472	P57,398,780	P865,436,252
Fair value gain (loss) during the year (Note 21)	40,956,908	(167,630)	40,789,278
Net book value	P848,994,380	P57,231,150	P906,225,530

The investment properties pertain to land and buildings located in Mandaluyong City and Bacolod City which are being leased out to other parties, parcels of land located in Ternate, Cavite, Daraga, Albay and Quezon City acquired through foreclosure which are held for capital appreciation, and land and buildings with mixed use also located in Mandaluyong City and Bacolod City which are being leased out to other parties.

The fair values of the investment properties as of December 31, 2024 and 2023 are based on valuations performed by Cuervo Appraisers, Inc. (CAI), an independent appraiser accredited by the IC and is a specialist in valuing these types of investment properties.

The fair values of the land properties and buildings, representing their highest and best use, were arrived at by using the market and cost approach, respectively. The cost approach is a comparative approach to the value of property or another asset that considers as a substitute for the purchase of a given property, the possibility of constructing another property that is a replica of, or equivalent to, the original or one that could furnish equal utility with no undue cost resulting from delay. It is based on the reproduction cost (new) or replacement cost (new) of the subject property or asset, less total (accrued) depreciation, plus the value of the land to which an estimate of entrepreneurial incentive or developer's profit/loss is commonly added. The market approach is a comparative approach to value that considers the sales of similar or substitute properties and related market data and establishes a value estimate by processes involving comparison.

The Company classifies the fair value of its investment properties under Level 3 in the fair value hierarchy (see Note 30).

The comparison of the acquisition costs and fair value for each type of investment property is as follows:

2024			
	Land	Building	Total
Acquisition costs	P199,917,033	P35,398,847	P235,315,880
Fair value gains	699,806,031	26,788,383	726,594,414
Net book value	P899,723,064	P62,187,230	P961,910,294

2023			
	Land	Building	Total
Acquisition costs	P199,917,033	P35,398,847	P235,315,880
Fair value gains	649,077,347	21,832,303	670,909,650
Net book value	P848,994,380	P57,231,150	P906,225,530

Net book values at end of year		P33,824,988	P69,272,408	P1,009,255,449

As of December 31, 2024 and December 31, 2023, the properties' fair values, representing their highest and best use, are based on valuations performed by CAI, an independent appraiser accredited by the Insurance Commission and is a specialist in valuing these types of properties.

The fair values of the buildings were arrived at by using the cost approach, whereas the land properties were estimated using the market approach. The cost approach is a comparative approach to the value of property or another asset that considers as a substitute for the purchase of a given property, the possibility of constructing another property that is a replica of, or equivalent to, the original or one that could furnish equal utility with no undue cost resulting from delay.

It is based on the reproduction cost (new) or replacement cost (new) of the subject property or asset, less total (accrued) depreciation, plus the value of the land to which an estimate of entrepreneurial incentive or developer's profit / loss is commonly added. The market approach is a comparative approach to value that considers the sales of similar or substitute properties and related market date and establishes a value estimate by processes involving comparison.

The Company classifies the fair values of its property and equipment under Level 3 in the fair value hierarchy (see Note 30).

Had the land and buildings been accounted for using the cost model, the carrying amounts as of December 31, 2024, and 2023 would have been as follows:

2024			
	Land	Building	Total
Acquisition costs	P75,357,374	P568,398,007	P643,755,381
Accumulated depreciation	—	(153,478,379)	(153,478,379)
Net book value	P75,357,374	P414,919,628	P490,277,002

2023			
	Land	Building	Total
Acquisition costs	P75,357,374	P371,535,585	P446,892,959
Accumulated depreciation	—	(136,327,309)	(136,327,309)
Net book value	P75,357,374	P235,208,276	P310,565,650

The cost of fully depreciated property and equipment still used in operations amounted to P392.74 million and P305.34 million as of December 31, 2024 and 2023, respectively.

Details of depreciation and amortization in the statement of income are as follows:

	Notes	2024	2023
Property and Equipment		P59,482,436	P59,969,019
Intangible assets	12	30,058,779	20,347,869

Creditable withholding taxes represent the taxes withheld at source by the counterparties which can be applied against future income tax liability.

Input VAT pertains to unclaimed VAT from paid purchases or expenses from various brokers, agents and suppliers as of December 31, 2024 and 2023.

Deferred input VAT pertains to VAT on uncollected purchases or expenses from various brokers, agents and suppliers.

Claims fund pertains to deposits paid by the Company to various brokers intended as advance payment of claims and any remaining balance may be refunded once brokers' contracts end up.

Salvage recoveries - total loss units pertain to estimated value of recovered vehicles from motor car claims.

Security deposits pertain to deposits paid by the Company in relation to its lease of office space which are applied for rental and unbilled utilities at the end of the lease contract.

Documentary stamps inventory pertains to unused documentary stamp purchased from the Bureau of Internal Revenue (BIR). This is affixed to documents, instruments, loan agreements and paper evidencing the acceptance, assignment, sale or transfer of an obligation, right or property.

Security fund pertains to investment/placement deposited to the IC.

Prepayments pertain to cash paid in advance by the Company in relation to its rental, advertising and other agreements with third parties.

Based on management's assessment, the Company's other assets amounting to ₱7.10 million as of December 31, 2024 and ₱44.02 million as of December 31, 2023 was considered impaired.

	Note	2024	2023
At January 1		₱44,017,913	₱44,017,913
Provisions for impairment losses	25	4,100,750	—

15. Insurance Payables

The roll forward analysis of this account follows:

	Note	2024	2023
At January 1		P4,134,919,356	P4,903,234,097
Additions	22	9,006,676,388	8,908,549,755
Payments		(8,213,017,494)	(9,676,864,496)
		P4,928,578,250	P4,134,919,356

16. Accounts Payable and Accrued Expenses

This account consists of:

	2024	2023
Commissions payable	P1,016,109,196	P546,852,924
Provisions	384,418,211	381,742,886
Accounts payable	280,948,229	340,666,131
Deferred output VAT	495,303,406	313,223,112
Payable to government agencies	207,123,094	145,898,587
Documentary stamp taxes payable	165,220,870	124,757,464
Accrued expenses	44,448,990	34,652,653
Others	127,542,307	36,356,597
	P2,721,114,303	P1,924,150,354

In 2024 and 2023, the Company recognized provisions for legal cases and other estimated liabilities amounting to P384.42 million and P381.74 million. Details are as follows:

	Note	2024	2023
At January 1		P381,742,886	P589,575,413
Additions	25	367,018,580	370,343,255
Payments		(250,004,645)	(494,746,136)
Adjustments and reversal		(114,338,610)	(83,429,647)
		P384,418,211	P381,742,886

Commissions payable pertain to sales force commissions which are non-interest bearing and payable every month.

Deferred output VAT is the amount of VAT that is not yet due until the invoice is collected.

Payable to government agencies include taxes withheld from staff and agents, fringe benefits taxes, local government tax, fire service tax, and premium tax.

Documentary stamp taxes payable pertains to the excise taxes imposed on certain rights embodied in a document evidencing such rights which are due to the Bureau of Internal Revenue (BIR).

Accrued expenses include accruals of general expense such as professional and legal fees, utilities, etc., and are expected to be settled within twelve (12) months after the end of the reporting period.

Accounts payable represent payables for goods and services purchased that have been contracted for but not yet settled as of the end of the reporting period which are payable on demand.

17. Net Pension Asset / Obligation

The Company has a funded, non-trusteed and non-contributory defined benefit retirement plan covering all of its employees.

Under the existing regulatory framework, Republic Act No. 7641 requires a provision for retirement pay to qualified private sector employees in the absence of any retirement plan in the entity, provided however that the employee's retirement benefits under any collective bargaining and other agreements shall not be less than those provided under the law. The law does not require minimum funding of the plan.

Net pension asset as of December 31 is as follows:

	2024	2023
Present value of pension benefit obligation	P377,384,884	P329,340,085
Less: Fair value of plan assets	456,636,699	423,643,969
	(P79,251,815)	(P94,303,884)

Net pension benefit expense for the years ended December 31 consists of the following:

	Note	2024	2023
Current service cost	25	P22,905,339	P19,911,224
Net interest cost		(5,686,524)	(7,461,976)
		P17,218,815	P12,449,248

Remeasurement loss (gain) on defined benefit plan recognized in other comprehensive income for the years ended December 31 are as follows:

	2024	2023
Remeasurement loss (gain) arising from:		
Experience adjustments	P13,841,038	(P6,091,668)
Changes in financial assumptions	(1,521,285)	11,571,574
	12,319,753	5,479,906
Return on assets, excluding amount included in net interest cost	9,513,501	12,132,448
	21,833,254	17,612,354
Tax effect	(5,458,314)	(4,403,089)
Remeasurement loss (gain)	P16,374,940	P13,209,265

Details of accumulated remeasurement loss on defined benefit plan as of December 31, 2024 and 2023 is as follows:

	Note	2024	2023
At January 1		P100,010,794	P86,801,529
Remeasurement loss (gain) recognized in other comprehensive income during the year		21,833,254	17,612,354
		121,844,048	104,413,883
Tax effect	26	(5,458,314)	(4,403,089)
At December 31		P116,385,734	P100,010,794

The reconciliation of the present value of defined benefit obligation as of December 31 is as follows:

	2024	2023
At January 1	P329,340,085	P292,428,476
Current service cost	22,905,339	19,911,224
Interest cost	19,859,207	20,528,479
Benefits paid	(7,039,500)	(9,008,000)
Actuarial losses (gains) on obligation	12,319,753	5,479,906
At December 31	P377,384,884	P329,340,085

The movements in the fair value of the plan assets as of December 31 is as follows:

	2024	2023
At January 1	P423,643,969	P398,724,427
Interest income	25,545,731	27,990,455
Contributions	24,000,000	18,069,535
Return on assets (excluding amount included in net interest cost)	(9,513,501)	(12,132,448)
Benefits paid	(7,039,500)	(9,008,000)
At December 31	P456,636,699	P423,643,969

The actual return on plan assets amounted to ₱16.03 million and ₱15.86 million in 2024 and 2023, respectively.

The distribution of plan assets as of December 31, 2024 and 2023 is as follows:

	2024	2023
Cash on hand and in banks	₱432,290,030	₱399,306,416
Receivables	24,346,670	24,337,553
	₱456,636,699	₱423,643,969

The carrying value of the retirement plan assets approximates its fair value as of December 31, 2024 and 2023. The plan assets are diverse investments and do not have any concentration risk.

The Company does not currently employ any asset-liability matching strategy.

The pension benefit expense and the present value of the defined benefit obligation are determined using actuarial valuations. The latest actuarial valuation report is as of December 31, 2024. The actuarial valuation involves making various assumptions.

The principal actuarial assumptions used to determine pension benefits as of December 31, 2024 and 2023 are as follows:

	2024	2023
Discount rate	6.13%	6.03%
Salary increase rate	5.00%	5.00%

The Company's discount rate for the defined benefit obligation was determined by reference to market yields at the reporting date of high-quality corporate bonds or government bonds consistent with the estimated term of the obligations. A lower discount rate would increase the present value of benefit obligations. The expected salary increase rate was determined by considering inflation, seniority, promotion and other factors. The Company evaluates these assumptions on a periodic basis taking into consideration current market conditions and historical market data.

The Company performed sensitivity analysis for the changes in the significant assumptions that would increase the defined benefit obligation. The sensitivity analysis has been determined based on reasonably possible changes in the following assumptions occurring at the end of the reporting date assuming all other assumptions were held constant.

	Increase (Decrease)	Increase (decrease) in Defined Benefit Obligation	
		2024	2023
Discount rate	0.50%	(₱6,917,025)	(₱6,452,960)
	-0.50%	8,143,897	7,576,320
Salary increase rate	1.00%	17,414,629	16,432,100
	-1.00%	(12,286,154)	(11,448,162)

Shown below is the maturity analysis of the undiscounted benefits payments as of December 31, 2024 and 2023 is as follows:

	2024	2023
Less than 1 year	P144,905,211	P111,367,976
More than 1 year to 5 years	108,188,987	100,773,018
More than 5 years to 10 years	195,615,173	187,259,828
More than 10 years to 15 years	184,978,547	161,024,966
More than 15 years to 20 years	232,827,530	223,706,776
More than 20 years	999,439,907	895,809,528
	P1,865,955,355	P1,679,942,092

The weighted average duration of the defined benefit obligation is 16 years as of December 31, 2024 and 2023.

18. Other Liabilities

This account consists of:

	2024	2023
Customers' deposits	P925,976,835	P821,410,651
Reinsurers' deposits	16,500,916	150,691,390
Others	123,381,478	53,079,847
	P1,065,859,229	P1,025,181,888

Customers' deposits pertain to security deposits from policyholders holding bond insurance policies.

Reinsurers' deposits pertain to advance collection from reinsurers of their share on reinsurance recoverable from paid losses.

Others consist mainly of checks awaiting for release, deposits-rental payable, and benefits.

19. Equity

a. Capital Stock

As of December 31, 2024 and 2023, capital stock consists of 15.00 million issued common shares, with par value of P100.00 per share, amounting to a total of P1.5 billion.

On March 8, 2021, the BOD approved the increase of the authorized capital stock of the Company from 15.00 million shares to 35.0 million shares.

On April 28, 2021, several shareholders infused P1.6 billion, of which 9.00 million shares at P100.00 per share amounting to P900.0 million were immediately issued from the Company's unissued capital stock through a subscription agreement. The remaining P700.00 million representing 7.00 million shares at P100.0 per share was recorded as equity under 'Deposit on Future Subscription' in the statement of financial position, which shall be immediately issued once sufficient authorized capital stock become available.

On August 15 and December 29, 2022, additional capital amounting to P150.0 million and P400.0 million, respectively, were infused by Stockholders. The aforesaid additional capital was recorded in equity and set aside as Deposit on Future Subscription until sufficient authorized capital stock and corresponding shares are available for issuance and subscription.

b. Contributed Surplus

This represents the original contribution of the shareholders of the Company in addition to the paid-up capital stock, in order to comply with the pre-licensing requirement under the Insurance Code. Contributed surplus amounted to ₱23.69 million as of December 31, 2024 and 2023.

c. Contingency Surplus

This represents contributions of the shareholders in order to comply with capital requirements of the Insurance Code. This can be withdrawn only upon approval of the IC. As of December 31, 2024 and 2023, the Company's contingency surplus amounted to ₱139.07 million.

d. Deposits for Future Subscription

This represents additional capital infusion of the shareholders in order to comply with capital requirements of the Insurance Code.

Following the BOD approval on the increase of the authorized capital stock, the Company's shareholders infused an additional ₱700.00 million in 2021 and ₱550.00 million in 2022 which were recognized as deposits for future stock subscription. As of date of approval of financial statements, the increase in the authorized capital stock is still pending approval with the Securities and Exchange Commission.

20. Related Party Transactions

Transactions between related parties are based on terms similar to those offered to non-related parties. Parties are related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making financial and operating decisions and the parties are subject to common control or common significant influence. Related parties may be individual or corporate entities. In considering each possible related entity relationship, attention is directed to the substance of the relationship and not merely the legal form.

The related parties in these financial statements refer to the following:

Related Parties	Relationship
PGA Sampo Insurance Corp. (PGA Sampo)	With similar shareholders and directors
First Life Financial, Inc. (First Life)	With similar shareholders and directors
PGA Cars, Inc. (PGA Cars)	With similar shareholders and directors
National Grid Corporation (NGC)	With similar shareholders and directors
Oriental Petroleum and Mineral Corporation (OPMC)	With similar shareholders and directors
R. Coyiuto Securities, Inc. (RCSI)	With similar shareholders and directors
Pioneer Tours Corporation	With similar shareholders and directors

The Company has the following transactions with related parties:

Dividend income	7	14,184,916	15,244,775
Gain on sale of AFS financial assets	7	–	4,175,046
Fair value gains on financial assets at FVPL	7	55,618,283	54,405,581
Gains on redemption on financial assets at FVPL	7	2,508,686	3,868,960
		P408,506,479	P373,053,702

22. Net Premiums Earned

Net premiums earned consist of the following:

	Notes	2024	2023
Gross premiums on insurance contracts:			
Direct		P13,354,341,686	P13,087,421,957
Assumed		418,014,993	198,001,207
Total gross premiums on insurance contracts	14	13,772,356,679	13,285,423,164
Gross change in provision for unearned premiums		404,345,454	(742,438,594)
Total gross premiums earned on insurance contracts		14,176,702,133	12,542,984,570
Reinsurers' share of gross premiums on insurance contracts			
Direct		8,816,052,130	8,861,103,265
Assumed		190,624,258	47,446,490
Total reinsurers' share of gross premiums on insurance contracts	14, 15	9,006,676,388	8,908,549,755
Reinsurers' share of gross change in provision for unearned premiums		953,268,990	(1,169,578,620)
Total reinsurers' share of gross premiums earned on insurance contracts		9,959,945,378	7,738,971,135
Net premiums earned		P4,216,756,755	P4,804,013,435

23. Other Income

This account consists of:

	2024	2023
Other underwriting income	P226,992,901	P89,583,621
Service income	12,460,676	14,833,002
Miscellaneous	125,855,301	43,456,546
	P365,308,878	P147,873,169

Other underwriting income pertains to service fees, no claim bonus and discounts from foreign reinsurers.

Service income is derived from professional services to counterparties.

24. Net Insurance Contract Benefits and Claims

Net insurance contract benefits and claims paid consist of the following:

	Note	2024	2023
Direct		P3,277,699,341	P5,050,249,328
Assumed		24,529,424	76,540,014
	14	P3,302,228,765	P5,126,789,342

Reinsurers' share of insurance contract benefits and claims paid consist of the following:

	Note	2024	2023
Direct		P1,181,253,618	P3,575,015,230
Assumed		31,047,404	14,665,729
	14	P1,212,301,022	P3,589,680,959

Gross change in insurance contract benefits and claims liabilities is as follows:

	Note	2024	2023
Change in provision for claims reported and loss adjustment expenses			
Direct	14	P162,594,560	(P6,363,893,945)
Assumed	14	(6,536,124)	(83,890,039)
Change in provision for claims IBNR	14	23,341,966	(372,692,347)
	14	P179,400,402	(P6,820,476,331)

Reinsurers' share of change in insurance contract benefits and claims liabilities follow:

	Note	2024	2023
Reinsurers' share of change in insurance provision for claims reported and loss adjustment expenses	14	P676,502,487	(P6,650,365,693)
Reinsurers' share change in provision for claims IBNR	14	352,429,199	(227,671,721)
		P1,028,931,686	(P6,878,037,414)

25. General Expenses

This account consists of:

	Notes	2024	2023
Salaries, wages and benefits	20	P727,403,004	P692,438,124
Service fees		184,057,190	135,136,828

(Forward)			

Provision for credit and impairment losses on AFS financial assets (Note 7)	7	–	488,000
Others		9,741,115	3,530,861
		P1,472,379,900	P1,338,408,211

Others include expenses related to internet subscriptions and bank charges.

26. Income Tax

The Company's provision for (benefit) from income tax

	2024	2023
Current	P11,114,711	P54,652,759
Final	48,196,962	43,251,553
Deferred	(80,698,824)	(12,273,694)
	(P21,387,151)	P85,630,618

- a. The current provision for income tax represents MCIT and RCIT in 2024 and 2023, respectively.

The reconciliation of income before tax using the statutory corporate income tax of 25% in 2024 and 2023 to provision for income tax as shown in the statements of income is as follows:

	2024	2023
Provision for income tax	P4,849,895	P74,663,187
Increase (decrease) in income tax resulting from:		
Nontaxable income	(32,869,558)	(31,899,077)
Nondeductible expenses	6,580,081	17,556,655
Changes in unrecognized DTA	52,431	25,309,853
	(P21,387,151)	P85,630,618

- b. The components of the net deferred tax assets (liabilities) follows:

	2024	2023
Deferred tax assets on:		
Affecting profit or loss:		
Provision for claims IBNR, net of reinsurance	P162,628,594	P244,900,402
Lease liability	48,861,437	61,770,741
Unrealized foreign exchange loss	–	2,414,825
Minimum corporate income tax (MCIT)	11,114,711	–
Net operating loss carry-over (NOLCO)	196,073,559	–
Affecting other comprehensive income:		
Remeasurement loss on defined benefit plan	5,458,314	4,403,089
	424,136,615	313,489,057
Deferred tax liabilities on:		
Affecting profit or loss:		
Unrealized gain on revaluation of investment properties	(181,648,604)	(167,727,413)
Right of use assets	(47,828,803)	(62,125,908)
Post-employment benefit asset	(22,587,906)	(25,295,699)
Unrealized foreign exchange gains	(27,574,127)	–
Affecting other comprehensive income:		
Revaluation gain on property and equipment	(138,663,782)	(121,151,774)
	(418,303,222)	(376,300,794)
Deferred tax asset (liabilities) - net	P5,833,393	(P62,811,737)

27. Contingencies

Various legal actions and claims are pending or may be assessed in the future against the Company from litigations and claims incident in the ordinary course of business. Related risks have been analyzed as to likelihood of occurrence. Although the outcome of these matters cannot always be ascertained with precision, management believes that no material liabilities are likely to result.

28. Leases

28.1 Company as Lessee

The Company is a party under various leases covering certain offices which have lease terms between one (1) to ten (10) years for its branches and main office. The leases provide for escalation of annual rates and are renewable under certain terms and conditions.

In addition, the Company has certain lease contracts with lease terms of twelve (12) months or less and/or with low value. The Company applies the 'short-term lease' and 'lease of low-value assets' recognition exemptions for these leases.

The roll forward analysis of right-of-use assets follows:

	Notes	2024	2023
At January 1		P324,299,737	P172,696,043
Additions		18,224,911	287,514,432
Lease terminations		(15,412,049)	(135,910,738)
At December 31		327,112,599	324,299,737
Accumulated depreciation			
At January 1		83,213,739	120,591,319
Depreciation	11, 25	74,038,719	65,276,107
Lease terminations		(14,037,436)	(102,653,687)
At December 31		143,215,022	83,213,739
Net Book Value		P183,897,577	P241,085,998

The following are the amounts recognized in statement of income in 2024 and 2023:

	Notes	2024	2023
Depreciation expense of right-of-use assets	25	P74,038,719	P65,276,107
Interest expense on lease liabilities		18,786,841	19,422,396
Expenses relating to short-term leases	25	30,105,654	35,422,384
Total amount recognized in the statement of income		P122,931,214	P120,120,887

The rollforward analysis of the lease liabilities is as follows:

	2024	2023
At January 1	P250,395,968	P53,868,444
Addition	18,224,911	287,514,432
Interest expense	18,786,841	19,422,396
Payments	(87,064,622)	(76,231,678)
Lease terminations	(1,584,342)	(34,177,626)
At December 31	P198,758,755	P250,395,968
	2024	2023
Current	P68,385,441	P66,821,825
Noncurrent	130,373,314	183,574,143
Lease liabilities included in the financial position at December 31	P198,758,755	P250,395,968

Shown below is the maturity analysis of the undiscounted lease payments:

	2024	2023
Within one (1) year	P81,968,368	P84,919,634
After one (1) year but not more than five (5) years	143,632,127	206,618,040
	P225,600,495	P291,537,674

The total cash outflows for leases amounted to P87.06 million and P76.23 million as at December 31, 2024 and 2023, respectively.

28.2 Company as Lessor

The Company has entered into a property leases on its investment property portfolio which have lease terms between three to five years. The leases provide for escalation of annual rates and are renewable under certain terms and conditions. In 2024 and 2023, rent income amounted to P26.05 million and P27.46 million, respectively, and is included under 'Investment and other income – net' account in the statements of income (see Note 21).

29. Management of Capital, Insurance and Financial Risks

29.1 Regulatory Framework

Regulators are interested in protecting the rights of the policyholders and maintain close vigil to ensure that the Company is satisfactorily managing affairs for their benefit. At the same time, the regulators are also interested in ensuring that the Company maintains appropriate solvency position to meet liabilities arising from claims and that the risk levels are at acceptable levels.

The operations of the Company are subject to the regulatory requirements of the IC. Such regulations not only prescribe approval and monitoring of activities but also impose certain restrictive provisions [e.g., minimum statutory net worth and risk-based capital (RBC) requirements].

29.2 Capital Management Framework

The Company maintains a certain level of capital to ensure sufficient solvency margins and to adequately protect the policyholders.

The Company reviews the capital requirements through monthly computation of the minimum statutory net worth and the RBC which are regularly communicated to the major shareholders. With this procedure, shareholders are forewarned in anticipation of the IC requirements of additional capital infusion.

Shareholders are well updated with these externally imposed capital requirements since these are being discussed during the annual BOD meeting. Evidently, the shareholders have shown their commitment to comply with this regulation, same as in the prior years when they willingly infused additional cash as the need arise.

29.3 Minimum Statutory Network

On August 15, 2013, the President of the Philippines approved the Republic Act No. 10607 to be known as the "New Insurance Code" (Amended Code) which provides the new capitalization requirements of all existing insurance companies based on net worth on a staggered basis starting June 30, 2015 up to December 31, 2022.

On January 13, 2015, the IC issued CL No. 02-2015 which provides clarifications on the minimum capitalization requirements under Sections 194, 197, 200 and 289 of the Amended Code. It also supersedes Department of Finance Order (DO) No. 15-2012, DO No. 27-2006, CL No. 22-2008 and CL No. 26-2008. According to the CL, the minimum net worth requirement would be 250.00 million by December 31, 2013. The minimum net worth shall be unimpaired at all times and shall increase to the amounts as follows:

Minimum Network	Compliance Date
550,000,000	December 31, 2016
900,000,000	December 31, 2019
1,300,000,000	December 31, 2022

As of December 31, 2024 and 2023, the required minimum statutory net worth for the Company is ₱1.30 billion. As of December 31, 2024 based on internal computation, the Company's estimated statutory net worth amounted to ₱992 million while as of December 31, 2023 based on Approved Synopsis by the Insurance Commission, the Company's statutory net worth amounted to ₱1.87 billion.

The final statutory net worth for 2024 can be determined only after the accounts of the Company have been examined by IC. Any deficiency as a result of the IC verification will be covered up in full by the Company.

On March 8, 2021, the Board of Directors approved the amendment of the Company's Articles of Incorporation to increase its authorized capital stock from ₱1.50 billion divided into 15.00 million shares at ₱100.00 par value to ₱3.50 billion divided into 35.00 million shares at ₱100.00 par value.

To comply with the capital requirements as mandated by the IC, a capital infusion amounting to ₱1.60 billion was made on April 29, 2021 by virtue of a subscription agreement, upon which 9.00 million shares at ₱100.00 per share amounting to ₱900.00 million were issued from the available portion of the authorized capital stock. The remaining ₱700.00 million divided into 7.00 million shares at ₱100.0 par value and additional capital of ₱150.00 million and ₱400.00 million infused on August 15 and December 29, 2022, respectively, were recognized in equity as 'Deposits on Future Subscription' in the statement of financial position, which shall be issued as actual shares to the investing shareholders immediately upon approval of the Company's application to increase its authorized capital stock. As of reporting date, the Company's application with the Securities and Exchange Commission is still in progress.

29.4 Risk-based Capital Requirements

Insurance Memorandum Circular (IMC) No. 7-2006 provides for the RBC framework for the nonlife insurance industry to establish the required amounts of capital to be maintained by companies in relation to their investment and insurance risks. Every nonlife insurance company is required annually to maintain a minimum RBC ratio of 100% and not to fail the trend test. Failure to meet the minimum RBC ratio shall subject the insurance company to the corresponding regulatory intervention which has been defined at various levels.

The RBC ratio shall be calculated as networth divided by the RBC requirement. Networth shall include the Company's paid-up capital, contributed and contingency surplus and unassigned surplus. Revaluation and fluctuation reserve accounts shall form part of networth only to the extent authorized by IC.

In 2016, the IC issued Circular Letter No. 2016-68, Amended Risk-Based Capital (RBC2) Framework, pursuant to Section 437 of the Amended Insurance Code. The RBC ratio shall be calculated as Total Available Capital (TAC) divided by the RBC requirement. TAC is the aggregate of Tier 1 and Tier 2 Capital minus deductions, subject to applicable limits and determinations.

Tier 1 Capital represents capital that is fully available to cover losses of the insurer at all times on a going- concern and winding up basis (e.g. Capital Stock, Statutory Deposit, Capital Stock Subscribed, Contributed Surplus, etc.). Tier 2 Capital does not have the same high-quality characteristics of Tier 1 Capital but can provide an additional buffer to the insurer (e.g. Reserve for Appraisal Increment- Property and Equipment, Remeasurement Gains (Losses) on Retirement Pension Asset (Obligation), etc.). Tier 2 Capital shall not exceed 50% of Tier 1 Capital.

The minimum RBC ratio is set at 100%. All insurance companies are required to maintain the minimum RBC ratio and not fail the Trend Test.

	2024 (Estimated)	2023 (IC Approved)
Total Available Capital	₱2,047,526,977	₱2,796,901,161
RBC Requirement	1,538,544,725	1,479,481,699
RBC Ratio	133%	189%

The final RBC Ratio for 2024 can be determined only after the accounts of the Company have been examined by IC specifically as to admitted and non-admitted assets as defined under the Code.

If the Company failed to meet the minimum required statutory network and RBC requirements, the IC is authorized to suspend or revoke all certificates of authority granted to such companies, its officers and agents, and no new business shall be done by and for such company until its authority is restored by the IC.

The Company's actual RBC ratio as of December 31, 2023 after verification by the IC is 189%.

29.5 Financial Reporting Framework

On December 28, 2016, IC CL No. 2015-29 was superseded by IC CL No. 2016-65 which was implemented beginning January 1, 2017. This circular prescribes the new financial reporting framework (FRF) used for statutory quarterly and annual reporting. The new FRF includes the economic valuation of asset and liabilities based on internationally accepted accounting, actuarial, and insurance core principles which requires quarterly and annual reporting of net worth to the IC. As of December 31, 2024, the Company's total estimated admitted assets amounted to ₱21.64 billion while as of December 31, 2023, the Company's total admitted assets based on Approved Synopsis by the Insurance Commission amounted to ₱21.38 billion.

29.6 Insurance Risk

The risk under an insurance contract is the risk that an insured event will occur including the uncertainty of the amount and timing of any resulting claim. The principal risk the Company faces under such contracts is that the actual claims and benefit payments exceed the carrying amount of insurance liabilities. This is influenced by the frequency of claims, severity of claims, when actual benefits paid are greater than originally estimated and subsequent development of long-term claims.

The Company principally issues the following types of general insurance contracts: fire, motor, accident, casualty, marine, engineering and surety. Risks under general insurance policies usually cover a twelve-month duration.

For general insurance contracts, the most significant risks arise from climate changes, natural disasters and terrorist activities. These risks vary significantly in relation to the location of the risk insured by the Company, type of risk insured and by industry. Undue concentration by amounts can have a further impact on the severity of benefit payments on a portfolio basis.

The above risk exposure is mitigated by diversification across a large portfolio of insurance contracts. The variability of risks is improved by careful selection and implementation of underwriting strategies, which are designed to ensure that risks are diversified in terms of type of risk and level of insured benefits. This is largely achieved through diversification across industry sectors and geography. Further, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are all policies and procedures put in place to reduce the risk exposure of the Company.

The Company further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the Company. The Company has also limited its exposure by imposing maximum claim amounts on certain contracts as well as the use of reinsurance arrangements in order to limit exposure to catastrophic events, for example hurricanes, earthquakes and flood damage.

The purpose of these underwriting and reinsurance strategies is to limit exposure to catastrophes to a predetermined maximum amount based on the Company's risk appetite as decided by management.

The following table sets out the concentration of the claim's liabilities by type of contract:

2024			
	Gross Contract Liabilities	Reinsurers Share of Liabilities	Net
Fire	P2,780,155,136	P2,179,171,550	P600,983,586
Engineering	341,236,790	272,388,020	68,848,770
Motorcar	503,026,432	143,024,497	360,001,935
Personal accident	11,696,217	917,202	10,779,015
Others	79,487,835	27,886,196	51,601,639
	P3,715,602,410	P2,623,387,465	P1,092,214,945
2023			
	Gross Contract Liabilities	Reinsurers Share of Liabilities	Net
Fire	P2,130,954,871	P1,369,675,608	P761,279,263
Engineering	919,928,711	538,015,333	381,913,378
Motorcar	359,775,214	165,136	359,610,078
Personal accident	13,392,877	1,345,725	12,047,152
Others	135,492,301	37,683,176	97,809,125
	P3,559,543,974	P1,946,884,978	P1,612,658,996

The most significant risk arises from climate changes and natural disasters. These risks vary significantly in relation to the location of the risk insured by the Company, type of risks insured and in respect of commercial and business interruption, insurance by industry.

The Company also enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the Company.

The Company also has limited its exposure level by imposing maximum claim amounts on certain contracts as well as the use of reinsurance arrangements in order to limit exposure to catastrophic events. The purpose of these underwriting and reinsurance strategies is to limit exposure to catastrophes to a predetermined maximum amount based on the Company's risk appetite as decided by management.

29.6.1 Assumptions

The principal assumption underlying the estimates is the Company's past claims development experience. This includes assumptions in respect of average claim cost, claims handling costs, claims inflation factors and claim numbers for each accident year. Judgment is used to assess the extent to which external factors such as judicial decisions and government legislation affect the estimates.

Other key assumptions include variation in interest, delays in settlement and changes in foreign currency rates.

29.6.2 Sensitivities

In insurance, as a rule, there may be claims filed in the current year that would attach policies issued in the previous years. This in effect makes claims provision highly sensitive as represented by the table below. Other unpredictable circumstances like legislative uncertainties make it impossible to quantify claims. Also, due to delays arising between occurrence of claims and their subsequent reporting to and settlement by the Company, the outstanding claim provisions cannot be ascertained with confidence at the end of the reporting period.

As a result, the final liabilities will change as a result of succeeding developments. Differences from recomputation of the final liabilities are taken up in subsequent financial statements.

The table below shows the impact of changes in certain important assumptions in the general insurance business while other assumptions remain unchanged. The interrelation of these assumptions will have an important impact in the computation of the final liabilities. But these assumption changes should be done on an individual basis to show the effect on the claims liabilities. It is worthwhile mentioning that these assumptions are nonlinear and larger or smaller impacts cannot be seen from these results.

Sensitivity analysis as of December 31, 2024 and 2023 follows:

2024				
	Change in Assumption	Increase (decrease) on Gross Insurance Liabilities	Increase (decrease) on Net Insurance Liabilities	Increase (decrease) on Profit Before Income Tax
Average claim costs	Increase by 10%	₱536,535,515	₱176,631,648	(₱176,631,648)
Average number of claims	Increase by 10%	1,079,946,584	296,411,003	(296,411,003)

2023				
	Change in Assumption	Increase (decrease) on Gross Insurance Liabilities	Increase (decrease) on Net Insurance Liabilities	Increase (decrease) on Profit Before Income Tax
Average claim costs	Increase by 10%	P587,316,984	P184,036,683	(P184,036,683)
Average number of claims	Increase by 10%	953,927,840	257,840,930	(257,840,930)

29.6.3 Loss Development Triangle

The table in the succeeding page is an exhibit that shows the development of claims over a period of time. It shows the cumulative incurred claims for each successive accident year at each reporting date, together with cumulative claims.

Gross insurance contract liabilities as of December 31, 2024:

Accident Year	2014 & Prior	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Total
Estimate of ultimate claims costs:												
At the end of accident year	P2,604,998,086	P2,099,915,654	P2,171,895,950	P2,555,747,508	P3,038,989,137	P5,554,857,027	P3,190,964,664	P4,681,383,787	P2,654,023,902	P2,037,581,785	P2,880,723,286	P2,880,723,286
One year later	2,229,464,170	2,206,787,120	1,704,682,632	3,024,242,444	3,353,717,401	5,862,703,348	3,511,269,904	8,221,988,606	2,544,442,657	4,791,950,633		4,791,950,633

29.7 Financial Risk

The Company is exposed to financial risk through its financial assets and financial liabilities. In particular, the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance contracts. These financial risks are credit risk, liquidity risk and market risk.

These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements. The risk that the Company primarily faces due to the nature of its investments and liabilities is interest rate risk.

29.7.1 Credit Risk

Credit risk is a risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. Prior to extending credit, the Company manages its credit risk by assessing the credit quality of its counterparties.

Another way by which the Company manages its credit risk exposure is through credit analysis. This is a process of assessing the credit quality of a counterparty that entails judgment. The credit policy group reviews all information about the counterparty which may include the counterparty's statement of financial position, statements of income and other market information. The nature of the obligation is likewise considered. Based upon this analysis, the credit analyst assigns the counterparty a credit rating to determine whether or not credit may be provided. Credit risk limit is also used to manage credit exposure which specifies exposure limits for each intermediary depending on the size of its portfolio and its ability to meet its obligation based on past experience.

The following table provides information regarding the credit risk exposure (gross of allowance for impairment losses) of the Company as of December 31, 2024 and 2023:

	2024	2023
Cash and cash equivalents*	P4,869,470,766	P4,394,869,248
Short-term investments	17,640,569	780,056,688
Insurance receivables:		
Due from agents and brokers	3,925,913,780	3,753,407,402
Reinsurance recoverable on paid losses	820,738,650	948,600,299
Due from ceding companies	292,087,597	70,617,989
Financial assets:		
Financial assets at FVPL	2,150,834,125	1,495,151,110
HTM financial assets	518,365,868	446,169,271
Loans and receivables	56,646,367	83,632,778
Total	P12,651,697,722	P11,972,504,785

*Amount excluding cash on hand

The following table provides information regarding the credit risk exposure of the Company classifying financial assets according to the Company's credit ratings of the counterparties.

As of December 31, 2024

	Neither Past Due or nor Impaired		Past Due or Impaired	Total

Credit Risk Disclosures

The following table shows the carrying amounts of the SPPI assets as of December 31, 2024 in accordance with PAS 39 categories by credit risk rating grades reported to key management personnel. The carrying amounts are measured in accordance with PAS 39. For assets measured at amortized cost, the carrying amount shown below is net of allowance for impairment losses.

	Total	High	Medium	Past Due
Financial assets at FVPL:				
Debt securities:				
Government	P1,828,421,474	P1,828,421,474	P-	P-

*Excluding cash on hand

The credit quality of the financial assets was determined as follows:

Cash and Cash Equivalents, Financial Assets at FVPL and Loans and Receivables

High grade pertains to cash and cash equivalents deposited or invested in local banks belonging to the top 10 rankings and financial assets at FVPL with counterparties (including the Philippine Government) having a strong capacity to meet their obligations.

Insurance Receivables

High grade pertains to receivables from counterparties with strong capacity to meet their obligations and have no history of default in payment; medium grade pertains to receivables that are usually collected beyond 60 days. Accounts beyond the standard 90-day credit term are classified as 'past due'.

The tables below show the aging analysis of past due but not impaired and impaired financial assets:

As of December 31, 2024

	Past Due but not Impaired			Total
	91 to 120 days	121 to 360 days	Over 360 days

29.7.2 Liquidity Risk

Liquidity risk is the risk that an entity will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from either the inability to sell financial assets quickly at their fair values or counterparty failing on repayment of a contractual obligation; or insurance liability falling due for payment earlier than expected or inability to generate cash inflows as anticipated.

The major liquidity risk confronting the Company is the daily calls on its available cash resources in respect of claims arising from insurance contracts.

The Company manages liquidity through a liquidity risk policy which determines what constitutes liquidity risk for the Company; specifies minimum proportion of funds to meet emergency calls; set up of contingency funding plans; specifies the sources of funding and the events that would trigger the plan; determines concentration of funding sources; reports liquidity risk exposures and breaches; monitoring compliance with liquidity risk policy and reviews liquidity risk policy for pertinence and changing environment.

The table below analyzes financial assets and liabilities of the Company, as well as the claims payable and related recoverable on reinsurers, into their relevant maturity groups based on the remaining period at the reporting dates to their contractual maturities or expected repayment dates.

**Amount excludes statutory liability

It is unusual for a company primarily transacting insurance business to predict the requirements of funding with absolute certainty as theory of probability is applied on insurance contracts to ascertain the likely provision and the time period when such liabilities will require settlement. The amounts and maturities in respect of insurance liabilities are based on management's best estimate leveraging its past experiences.

29.7.3 Market Risk

Market risk is the risk of change in fair values or cash flows of financial instruments from fluctuations in foreign exchange rates (currency risk), market interest rates (interest rate risk) and market prices (price risk), whether such change in price is caused by factors specific to the individual instrument or its issuer or factors affecting all instruments traded in the market.

The Company structures levels of market risk it accepts through a market risk policy that determines what constitutes market risk for the Company; the basis used to fair value financial assets and liabilities; asset allocation and portfolio limit structure; diversification benchmarks by type of instrument; the net exposure limits by each counterparty or group of counterparties, industry segments and market risk exposures; compliance with market risk policy and review of market risk policy for pertinence and changing environment.

29.7.4 Currency Risk

The Company's principal transactions are carried out in Philippine peso and its exposure to foreign exchange risk arises primarily with respect to the US and Singapore Dollar, Japanese Yen and Euro, as it deals with foreign reinsurers in its settlement of its obligations and receipt of any claim reimbursements.

The Company maintains US and Singapore Dollar-denominated, Japanese Yen and Euro-denominated fixed deposits to meet its dollar obligations from its dollar insurance products.

The following tables show the details of the Company's foreign currency-denominated monetary assets and their Philippine peso equivalents.

2024					
	USD	PHP	JPY	PHP

The following table demonstrates the sensitivity to a reasonably possible change in the foreign exchange rates, with all other variables held constant, of the Company's income before tax.

As of December 31, 2024			As of December 31, 2023	
Currency	Foreign currency appreciation / (depreciation)	Impact on income before tax Increase (decrease)	Foreign currency appreciation / (depreciation)	Impact on income before tax Increase (decrease)
US Dollar	4.28%	₱100,209,856	0.70%	₱21,078,859
	-4.28%	(100,209,856)	-0.70%	(21,078,859)
Japanese Yen	7.03%	161,541	6.21%	179,567
	-7.03%	(161,541)	-6.21%	(179,567)
Euro	1.65%	(8,510,002)	3.12%	8,416,733
	-1.65%	8,510,002	-3.12%	(8,416,733)
Singaporean Dollar	1.41%	2,560	1.21%	3,568
	-1.41%	(2,560)	-1.21%	(3,568)

There is no other impact on the Company's equity other than those already affecting the statement of income.

29.7.5 Interest Risk

Interest rate risk is the risk that the value/future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Floating rate instruments expose the Company to cash flow interest rate risk, whereas fixed interest rate instruments expose the Company to fair value interest rate risk. The Company's financial assets at FVPL, in particular, is exposed to fair value interest rate risk.

The Company's market risk policy requires it to manage interest rate risk by maintaining an appropriate mix of fixed and variable rate instruments. The policy also requires it to manage the maturities of interest-bearing financial assets and interest-bearing financial liabilities.

The following tables show information relating to the Company's interest-bearing financial assets based on maturity profile:

As of December 31, 2024

	Interest rate (%)	Maturity			Total
		Within a year	1-3 years	3-7 Years	
Cash in banks	0.00 - 0.20	P1,398,414,483	P-	P-	P1,398,414,483
Cash equivalents	3.125 - 6.05	3,471,056,283	-	-	3,471,056,283
Short-term investments and other investments	3.15 - 3.50	17,640,569	-	-	17,640,569
HTM financial assets	0.00 - 4.75	358,808,951	159,556,917	-	518,365,868
Financial assets at FVPL	0.00 - 6.125	1,893,182,535	96,889,139	160,762,452	2,150,834,126

As of December 31, 2023

	Interest rate (%)	Maturity			Total
		Within a year	1-3 years	3-7 Years	
Cash in banks	0.00 - 0.63	P1,099,306,527	P-	P-	P1,099,306,527
Cash equivalents	0.10 - 0.75	3,315,345,907	-	-	3,315,345,907
Short-term investments and other investments	0.10 - 1.25	784,207,265	-	-	784,207,265
HTM financial assets	0.00 - 4.75	241,428,012	128,887,500	92,906,000	463,221,512
Financial assets at FVPL	0.00 - 5.28	1,168,315,730	227,660,411	142,600,888	1,538,577,029

The analysis below is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on revaluing fixed rate financial assets at FVPL. The correlation of variables will have a significant effect in determining the ultimate impact on interest rate risk, but to demonstrate the impact due to changes in variables, variables had to be changed on an individual basis.

	Change in interest rates	Impact on income before tax Increase (decrease)
December 31, 2024	+50 basis points	(P27,787,719)
	-50 basis points	P27,809,141
December 31, 2023	+50 basis points	(P27,178,050)
	-50 basis points	P27,202,791

There is no impact on the Company's equity other than those already affecting net income.

29.7.6 Price Risk

The Company's price risk exposure at year end relates to financial assets and liabilities whose values fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk). This relates primarily to the Company's AFS equity financial assets.

Such equity securities are subject to price risk due to changes in market values of instruments arising either from factors specific to individual instruments or their issuers or factors affecting all instruments traded in the market.

The Company's market risk policy requires it to manage such risks by setting and monitoring objectives and constraints on investments; diversification plan; limits on investment in each sector and market.

The analysis below is performed for reasonably possible movements in the key variable, with all other variables held constant, showing the impact on equity that reflects changes in fair value of AFS equity financial assets.

Market Index	As of December 31, 2024		As of December 31, 2023	
	Change in equity prices	Impact on equity Increase (decrease)	Change in equity prices	Impact on equity Increase (decrease)
PSEi	+1.21%	P2,502,005	+1.80%	P4,071,713
PSEi	-1.21%	(P2,502,005)	-1.80%	(P4,071,713)

30. Fair Value Measurement

The following methods and assumptions are used to estimate the fair value of class of assets and liabilities for which it is practicable to estimate such value:

Cash and cash equivalents, short-term investments, insurance receivables, accounts receivables, insurance payables and accounts payable and accrued expenses.

Due to the short-term nature of the instruments, the fair values approximate the carrying amounts as of the reporting date.

Financial assets at FVPL, AFS financial assets and HTM financial assets

The fair value of financial assets at FVPL, AFS financial assets and HTM financial assets that are actively traded in organized financial markets are determined by reference to quoted market prices, at the close of business at each reporting date or the last trading day as applicable.

Fair value Hierarchy

The fair value hierarchy of the Company's financial and non-financial assets are summarized in the tables below.

2024				
	Carrying Value	Fair Value		
		Quoted Prices in active market (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value				
Financial Assets				
Financial assets at FVPL:				
Government securities	P2,137,251,133	P2,137,251,133	P-	P-
Private securities	13,582,992	13,582,992	-	-
Financial assets at AFS:				
Common shares	161,139,608	161,139,608	-	-
Preferred shares	43,787,765	43,787,765	-	-
Club Shares	172,100,000	172,100,000	-	-

Fair Value Disclosures

The table below presents an analysis of the fair value of classes of financial assets of the Company as of December 31, 2024, as well as the corresponding change in fair value for the year then ended. The financial assets are divided into two categories:

- Assets for which their contractual cash flows represent solely payments of principal and interest (SPPI), excluding any financial assets that are held for trading or that are managed and whose performance is evaluated on a fair value basis; and
- All financial assets other than those specified in SPPI above (i.e., those for which contractual cash flows do not represent SPPI, assets that are held for trading and assets that are managed and whose performance is evaluated on a fair value basis).

	SPPI Financial Assets		Other Financial Assets	
	Fair Value	Fair Value Change	Fair Value	Fair Value Change

Other receivables	26,181,845	—	—	—

*Amortized cost of these financial assets has been used as a reasonable approximation of fair value

As of February 21, March 10 and 11, 2025, the dates of valuation, the non-financial assets' fair values are based on the valuations performed by CAI.

The valuation techniques applied and the key inputs used in determining the fair values of investment properties and property and equipment carried at revalued amounts are as follows:

Location	Significant unobservable inputs	2024	2023
		Range (weighted average)	
Block 3, Lot 5 Barangay East Greenhills, Mandaluyong City	External factor	-5%	-10%

Significant increases (decreases) in price per square meter and size of property and equipment at revalued amount and investment property would result in a significantly higher (lower) fair value of the property.

Significant increases (decreases) in discount would result in a significantly lower (higher) fair value of the properties.

32. Notes to Statement of Cashflows

The roll-forward of lease liabilities is presented in Note 28.

Interest expense in 2024 and 2023 consists of:

	2024	2023
Cash		
Settlements with the BIR	P–	P17,883,473
Accretion from lease liabilities	18,786,841	19,422,396
	P18,786,841	P37,305,869

33. Supplementary Information Required under Revenue Regulations No. 15-2010

In compliance with the requirements set forth by Revenue Regulations (RR) No. 15-2010 hereunder are the information on taxes and license fees paid or accrued for the years ended December 31, 2024 and 2023.

a. Value-Added Tax (VAT)

- i. The Company is a VAT-registered entity with output VAT declarations of P1,305.98 million in 2024 and P1,153.95 million in 2023, based on total paid direct premiums of P10,883.13 million and P9,616.25 million, respectively.

The Company had no zero-rated transactions in 2024. In 2023, the Company recognized zero-rated transactions amounting to P32.96 million, which pertain to sales to an entity registered with the Philippine Economic Zone Authority (PEZA). Purchases by PEZA-registered entities are subject to zero-rated VAT pursuant to the provisions of Republic Act No. 7227, Revenue Regulations No. 2-2005, and BIR Ruling ITAD-45-00.

- ii. The amount of input VAT taxes claimed in 2024 and 2023 are broken down as follows:

	2024	2023
Balance at January 1	P44,513,594	P11,797,164
Current year's purchases/payments:		
Goods other than for resale	2,739,613	7,724,438
Services paid lodged under operating expenses	339,667,899	148,288,805
	386,921,106	167,810,407
Less: Input VAT applied against Output VAT	265,164,329	123,296,813
Balance at December 31	P121,756,777	P44,513,594

b. Taxes relating to Nonlife Insurance Policies

Taxes relating to nonlife insurance policies that have been shifted or passed on the policy holders and are not recognized in the statement of comprehensive income are as follows:

- i The total documentary stamp tax (DST) affixed on insurance policies amounted to ₱907.44 million and ₱1,230.35 in 2024 and 2023, respectively.
- ii Other taxes during year which represent the total amount accrued and paid follow:

	2024	2023
Fire service taxes	₱64,612,287	₱25,149,105
Local government taxes	23,176,560	14,497,263
Premium taxes	4,197,890	4,438,385
	₱91,986,737	₱44,084,753

c. Other Taxes and Licenses

Details of other taxes, local and national, including real estate taxes, license and permit fees are presented in the succeeding tables.

- i. National taxes and licenses:

	2024	2023
SEC filing fees	₱8,085,220	₱-
IC fees	6,289,261	4,600,150
DST	1,062,477	1,667,967
Fringe benefits tax	610,007	759,110
LTO registration	338,020	401,006
Annual registration/Certification fee-BIR	20,530	20,000
Other BIR fees	-	613,130
	₱16,405,516	₱8,061,363

- ii. Local taxes and licenses:

	2024	2023
Real property tax	₱2,205,355	₱3,857,741
Mayor's permit	1,072,896	938,856
Notarial fees	338,978	132,058
Community tax certificate	22,882	10,000
Other fees	1,754,292	667,005
	₱5,394,403	₱5,605,660

d. Excise Tax

The Company did not incur any excise tax in 2024 and 2023.

e. Withholding Taxes

The amount of withholding taxes for the year amounted to:

	2024	2023
Expanded withholding taxes	₱290,457,529	₱284,046,515
Tax on compensation and benefits	85,076,265	82,260,879
	₱375,533,794	₱366,307,394

- f. In October 2024, the Company paid tax assessments for the taxable year 2023 amounting to ₱250 million, inclusive of interest and penalty.

On the other hand, in 2023, the Company paid tax assessments for the taxable year 2022 and 2021 amounting to ₱558.06 million, inclusive of interest and penalty.

- g. Import costs (landed, custom duties) are not applicable for the Company.
